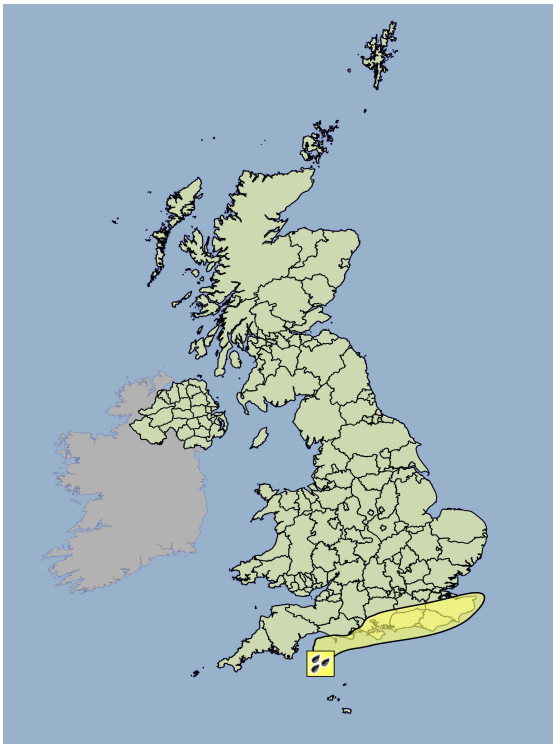
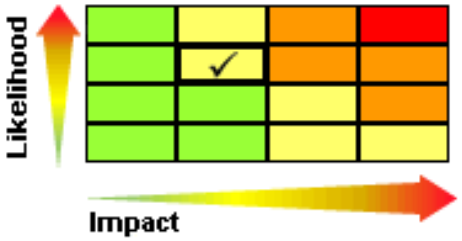
National Severe Weather Warning Service





Chief Forecasters Assessment
Frontal systems associated with a deep low pressure system will continue to affect southeastern areas through much of Saturday afternoon.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **18:00 on Fri, 20th Dec 2013** until **16:00 on Sat, 21st Dec 2013**

Further heavy rain will affect south and southeast England at times this afternoon, and the public should be aware of the risk of localised surface water flooding.

This is an update to the Alert issued on Friday, taking into account the fact that the heaviest of the rain has now cleared the more southwestern areas of Britain.
